IntelliFlo[™] VS & VF

Intelligent Variable Speed & Variable Flow pump

Product Awards

Best Swimming Pool Engineering Innovation **GOLDEN WAVE 2009** *Magazine Schwimmbad & Sauna (Germany)*

Innovation award Piscina Barcelona International Swimming Pool Exhibition (Spain)

Best product of the year ACW's Excellence Awards 2008 Arab Construction World (ACW) magazine (Middle East & North Africa)

Innovation award **Excelence Awards 2009** The Swimming Pool & Spa Association of Victoria (Australia)

An Eco Select[™] Choice

The IntelliFlo™ VS-3050 and the IntelliFlo™ VF have merited the Eco Select[™] brand that identifies our most eco-friendly products. They save energy, conserve water, eliminate noise and contribute to a more environmentally responsible equipment system (reduction of CO2 emissions or reduction of chemicals sent to the drain). The Eco Select brand is clearly our "greenest" and most efficient choice.

Characteristics of the IntelliFlo [™] VS and VF	VS-3050	VF
Possibility of reducing energy consumption up to -80% compared to single speed or two speed pumps	\checkmark	\checkmark
Tremendous cost savings due to very low energy consumption	\checkmark	\checkmark
Permanent magnet motor with ultra-high efficiency that operates at a lower temperature	\checkmark	\checkmark
Totally Enclosed Fan Cooled : no water / dust / humidity can enter the motor	\checkmark	\checkmark
Extremely quiet operation at low speeds	\checkmark	\checkmark
Increased pump lifetime due to slow running mode and very little heat emission from motor	\checkmark	\checkmark
3 year warranty	\checkmark	\checkmark
A pump that can adapt to the user's needs : increase motor speed or flow when a new application is installed (heater, fountain, cleaner) rather than install another pump	\checkmark	\checkmark
Smart anti-failure system (thermal overload protection, anti-freeze protection, under/over voltage protection)	\checkmark	\checkmark
Ultimate speed control : set any motor speed by steps of 10 RPM between 400 and 3'450 RPM = 305 speeds	\checkmark	\checkmark
Link external applications to the pump via the IntelliComm	\checkmark	\checkmark
CE certification	\checkmark	\checkmark
IntelliComm interface enables external applications to control the pumps speed/flow	\checkmark	\checkmark
Wet-end part easy to maintain, including a large prefilter basket	\checkmark	\checkmark
Owner manual translated into English, French, German, Italian, Spanish and Dutch	\checkmark	\checkmark
4 pre-set motor speeds for ease of operation	\checkmark	
Easy to operate with convenient keypad with 8 buttons	\checkmark	
Ultimate flow control : choose any specific flow between 4 and $30m^3/h$ with steps of $1m^3/h$		\checkmark
Flow is maintained constant even when filter is dirty		\checkmark
16 button LCD screen showing m3 / RPM / kWh consumption as well as other important data in 6 languages		\checkmark
Pump will stop in case of blockage of suction line : no risk of accidents such as entrapment		\checkmark
A timer allows programming of up to 9 different motor speeds or flows during specific time periods during the day		\checkmark
Protect against loss of prime : pump will turn off if not primed within specific timeframe		\checkmark
Automatically determines optimum flow after pool size and turnovers/day have been entered : reduced installation time		\checkmark
Program that modulates the flow to ensure minimum flow is maintained for specific application such as heater		\checkmark
Specific programs to customize the flow to enhance fountain effects		\checkmark
For seawater applications up to 4.5% salt concentration	SW5P6R [™] VS	
Can replace all conventional SW5P6R and 5P6R pumps	SW5P6R [™] VS	
Can replace all conventional UltraFlow pumps	UltraFlow [®] VS

IntelliFlo[™] VS & VF

Intelligent Variable Speed & Variable Flow pumps

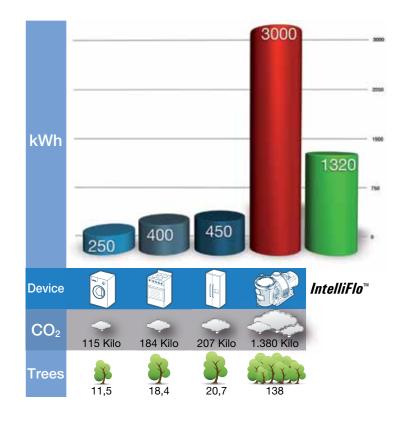

The biggest innovation in energy efficiency for pools

www.intelliflo.eu

Do you know how much energy a swimming pool pump consumes?

If we compare several domestic appliances like a washing machine, a kitchen cooker or a fridge, a pool pump consumes as much as 7 fridges!

That means that a single speed pool pump produces indirectly about 1,380,000 grams of CO₂, which is equivalent to 138 trees.

The IntelliFlo can provide tremendous energy savings. When operated at low speeds its energy consumption is reduced by as much as 80% compared with a regular single speed pool pump.

Considerations:

- Regular 1.5HP single speed pool pump, 3 turnovers/day, 10 hours/day and 200 days running time/year.
- 1 kWh = 460 Grams of CO₂.
- 1 Tree = 10 Kg of CO₂.

Sources:

The International Energy Agency (IEA – www.iea.org), European Commission of Energy (www.ec.europa.eu/energy) and own calculations.

How much will you save with an IntelliFlo[™]?

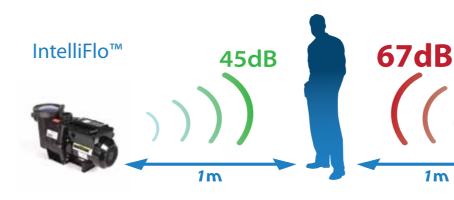

As you can see, the savings with IntelliFlo™ can be dramatic. Over the long life of the pump your savings could be huge.

- At €O,12/kWh estimated savings range from €170 to €440 per year
- At €0,24/kWh estimated savings range from €340 to €880 per year

Pool size in litres	Pump	Energy cost€/ kWh	Cost per day €	Cost per season €	IntelliFlo savings per year	IntelliFlo savings after 5 years	
30.000	1 HP Single speed	0.12	1.18	248.22			
		0.24	2.36	496.44			
	IntelliFlo®	0.12	0.37	78.12	€-170.10	€-850.50	
		0.24	0.74	156.24	€-340.20	€ -1,701.00	
60.000	2 HP Single speed	0.12	2.35	493.92			
		0.24	4.70	987.84			
	IntelliFlo®	0.12	0.79	166.32	€-327.60	€-1,638.00	
		0.24	1.58	332.64	€-655.20	€-3,276.00	
90.000	3 HP Single speed	0.12	3.50	735.84			
		0.24	7.01	1,471.68			
	IntelliFlo®	0.12	1.41	296.35	€ -439.49	€-2,197.45	
		0.24	2.82	592.70	€-878.98	€-4,394.90	

Assumptions: 3 turns/day, 10 hours/day and 200 days running time/year.

Extremely silent: "As quiet as a whisper!"

Multi-talent: 1 pump for all applications

Night filtration

The IntelliFlo is a variable speed pump, and as such it is possible to select a very precise speed or flow to perfectly suit your needs, at any time of the day...and night. These are some examples of what the IntelliFlo can do thanks to its multi-speed / multi-flow capabilities : night filtration at low speed to maintain the best possible pool chemistry, fine-tuning of overflowing pools or fountains, etc..

The IntelliFlo has also a direct impact on the water quality : not only will the filtration be improved at low speed (the debris will take longer to pass through the filter) but also the backwashing will be more efficient due to higher flow which clears the debris from the filter better.

How is it possible?

The Variable Speed Technology allows you to run your pump at very low speeds,

and running slowly dramatically reduces the energy consumption and the noise level. On top of that, the IntelliFlo[™] also lowers the CO₂ emissions, improves the filtration quality and the chlorination efficiency, extends the time between backwashes and services and much more.

Fine tuning

The IntelliFlo allows you to easily set the perfect speed between 400RPM and 3'450RPM by increments of 10 RPM, giving a total of 305 different speed settings. On top of that, with the IntelliFlo VF you can also set any flow between 4 and 30m³ per hour to get 27 different flows.

Scalable: your pool landscape changes, not your pump

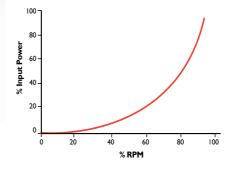

During its entire life, the pool will evolve as additional applications are installed. Previously, the solution was to install a more powerful pump in order to always have some free capacity to link to a cleaner or to a heater. But if more applications are required, such as a fountain, a second pump would probably be installed. With the IntelliFlo™

one pump will do the business. Thanks to its ability to deliver between 4 and 30m³ per hour, just connect the new application and increase the RPM until you are satisfied with the supplied flow.

Easy installation: this pump is installed in the same way as any other pool pump in the market

Pump Motor Speed vs. Power Consumption

Slow is better: Affinity law

This graph shows the huge increase in energy consumption as pump speed increases. Slow down the pump and you cut energy costs dramatically. A good analogy is your car: you will drive for much longer at 60km/h than at 120km/h

Why?

Because of the ultra-efficient permanent magnet motor and the affinity law: when the flow is divided by 2, the electricity consumption is divided by 8.

SLOW IS BETTER!
